## MA.3.M.I. 2

## 3rd Grade FAST Test Prep Freebies

Grace measures the temperature of the outside air in degrees Fahrenheit. At 7:00am, her thermometer measured $59^{\circ}$ F. At noon, her thermometer measured $82^{\circ} \mathrm{F}$. At $7: 15 \mathrm{pm}$, her thermometer measured $67^{\circ} \mathrm{F}$.

Select all of the statements that are true.
$\square$ The temperature increased by $37^{\circ} \mathrm{F}$ from 7:00am to noon.
[ The temperature increased by $23^{\circ} \mathrm{F}$ from 7:00am to noon.
$\square$ The temperature decreased by $15^{\circ} \mathrm{F}$ between noon and $7: 15 \mathrm{pm}$.
$\square$ The temperature decreased by $25^{\circ} \mathrm{F}$ between noon and $7: 15 \mathrm{pm}$.

- The difference between the temperature at 7:00am and 7:15pm is $8^{\circ} \mathrm{F}$.
$\square$ The difference between the temperature at 7:00am and $7: 15 \mathrm{pm}$ is $12^{\circ} \mathrm{F}$.
